

**Obtura  
Spartan.**  
Enhancing Endodontic Success®

# Welcome to the **MAX**

The **Obtura III MAX**® – the latest generation Obtura®.

**T**he latest in thermoplastic obturation – the Obtura III MAX provides Obtura Spartan customers with the same great clinical benefit they have come to expect from earlier Obtura solutions, while fine-tuning the product to better respond to the changing needs of the endodontic market. Moving forward, the canal shapes you create with newer, more effective instruments will demand the highest amount of tactile control to replicate those shapes during obturation.

Take your next obturation procedure to the **MAX!**

For over 25 years, one great back fill after another, Obtura Spartan has set the standard for obturation solutions with its Obtura line of heated gutta percha systems.

## Call today about our special Trade-In Offer!

This special applies to both Obtura Spartan-brand obturation systems and competing warm gutta percha systems. Call your Obtura rep today to learn more about this limited-time offer!

# Our clinically-acclaimed **Heated Gutta Percha System** just got better!

The Obtura III MAX's reliable operation drives our **unmatched 2-year warranty!**

The Obtura III MAX offers a completely retooled electronic board to further enhance the long-term reliability of your heated gutta-percha system. In fact, we're so confident in the dependable, repeatable clinical operation of this unit that we have doubled our traditional service warranty.

New, enhanced thermal protector significantly reduces heat around patient contact surfaces with a new, sleek design that drives warm air away from the tip of the unit and brings in cool air making patient safety a top priority.

Advanced connectivity creates worry-free operation with no downtime for charging. New, user-friendly connection allows for quick and easy replacement of handpiece

Obtura Spartan's proven cartridge-free operation allows users to maximize their obturation without the hassle of replacing gutta percha during a procedure.

Updated design and new unit face control makes for even easier handling during operation.

Ergonomically-designed handpiece trigger provides superior tactile feel and outstanding control. With Obtura III Max you can truly feel the fill!

Thumb-shaped handpiece grooves were designed for optimum comfort during operation while minimizing hand fatigue and stress.

**Used in more endodontic graduate programs than any other warm gutta percha system, backed by over two decades of trusted clinical performance, the Obtura III MAX is the preferred instrument for all backfill procedures.**

## Here is a complete listing of the Obtura III MAX product line!
